

## PARTNERS RX MANAGEMENT FORMULARY 2010

We are pleased to provide you with our Medication Selection Guide. This is a list of most commonly prescribed drugs, and is not intended to imply coverage. Please refer to your plan document for detailed information about drug benefit coverage.

Medications listed in Tier 1, Tier 2 and a limited number of Tier 3 drugs are Partners Rx preferred formulary agents. Medications listed in Tier 3 can be non-Preferred, non-Formulary agents, or in the case of some specialty products, may be classified as preferred or formulary. Depending upon benefit design, Tier 3 drugs may not be a covered benefit, or may be covered at higher copay. For our clients that have a defined specialty benefit, Tier 4 represents specialty pharmaceuticals, so designated because of shipping/handling, administration, and therapeutic management requirements. Tier 3 copays may apply if the plan benefit is not otherwise defined for specialty drugs.

Our Pharmacy and Therapeutics Committee has dedicated many hours to clinical analysis and has evaluated peer reviewed and other available evidence to determine a drug's safety and efficacy. Only after this rigorous clinical evaluation did the committee weigh the financial implications of the drug's clinical benefit compared with other similar therapies already available. In the end the P&T Committee has selected medications for inclusion in the Formulary based on the drugs' safety, efficacy, quality, and cost-effectiveness. Please note all drugs on the Formulary are subjected to periodic review and amendment without notice.

Because there is a continuous formulary review process, for the most up-to-date Formulary list visit our website at [www.partnersrx.com](http://www.partnersrx.com), from the main menu bar choose the option "**Look up your prescription or its generic alternatives on our formulary here**" then type in your drug name in the Search engine, or call the toll-free Partners Rx Customer Service Help desk at: 1-800-659-4112.

Please keep in mind when you choose a generic medication, patients will pay the lowest copay available under their pharmacy benefit plan. When clinically appropriate, please consider using the generic or Formulary brand-name medications listed in this guide.

*Thank you for your support of the Drug Formulary.*

TABLE OF CONTENTS		PAGE
1.0	Analgesics	2
2.0	Anesthetics	4
3.0	Antibiotics	4
